

Overview of Athabasca Oil Corporation

Athabasca Oil Corporation (“AOC”) is a unique liquids-weighted intermediate producer. At AOC, we proudly and responsibly produce Canadian energy to improve people’s lives. We are passionate, take ownership of our work, get things done and are great at what we do.

The company has a predictable low decline thermal business with >1 billion barrels of top quartile reserves and low sustaining capital requirements. Athabasca also has a de-risked light oil business in the Montney and Duvernay with peer leading netbacks and a large inventory of development locations.

AOC has positioned itself with strong financial capacity of over \$300 million (mostly cash) and no debt maturities until 2026. The corporate strategy is to generate significant free cash and provide superior returns to shareholders. The company is on track to be debt-free by 2023, putting it in an enviable position relative to its peers. Sustainability is core to the business with strong governance and a commitment to reducing emissions through its technology roadmap.

Athabasca has a track record of transformative projects including JV’s, M&A, royalties and unique marketing arrangements. AOC offers a dynamic and exciting work environment for the right candidate. AOC is publicly traded on the TSX under the symbol “ATH”.

Senior Thermal Development Engineer

We are currently recruiting for a Senior, Thermal Development Engineer, reporting to the Director, Thermal Development to provide reservoir engineering input optimizing SAGD field development for the Hangingstone and Corner asset. The successful candidate will also help develop strategies for future growth of the Hangingstone asset.

This position is based in Calgary.

Responsibilities

- Responsible to create full-field development plans that integrate geoscience data, facility requirements, and production forecasts to optimize future development for Athabasca’s Hangingstone and Corner assets
- Responsible for cost, schedule, and quality of proposed and approved capital projects
- Responsible for inputs into and conducting economic evaluation of capital projects
- Identify and evaluate opportunities to debottleneck and increase total potential field production
- Provide support to creation of annual budget, long range plans, and annual reserve evaluations
- Ownership of optimal well placement, spacing and configuration to maximize the economic performance
- Support preparation and execution of delineation and SAGD drilling programs
- Preparation of technical documents and presentations for technical staff and management
- Prepare presentations for Executive for Board presentations, budget, and reserves reviews
- Evaluation of alternative recovery processes and production technologies

Qualifications

- Minimum BSc. in Engineering and have good standing with APEGA with P.Eng., designation
- Minimum 10 years of development, or related, engineering experience with minimum of 5 years within SAGD
- Experience in working within a multidisciplinary team, with involvement making daily operational decisions
- Ability to create innovative solutions to enhance reservoir performance and optimize future development
- Strong communication skills, both written and verbal
- Must be legally entitled to work in Canada
