

Overview of Athabasca Oil Corporation

Athabasca Oil Corporation (“AOC”) is a unique liquids-weighted intermediate producer. At AOC, we proudly and responsibly produce Canadian energy to improve people’s lives. We are passionate, take ownership of our work, get things done and are great at what we do.

The company has a predictable low decline thermal business with >1 billion barrels of top quartile reserves and low sustaining capital requirements. Athabasca also has a de-risked light oil business in the Montney and Duvernay with peer leading netbacks and a large inventory of development locations.

AOC has positioned itself with strong financial capacity of over \$300 million (mostly cash) and no debt maturities until 2026. The corporate strategy is to generate significant free cash and provide superior returns to shareholders. The company is on track to be debt-free by 2023, putting it in an enviable position relative to its peers. Sustainability is core to the business with strong governance and a commitment to reducing emissions through its technology roadmap.

Athabasca has a track record of transformative projects including JV’s, M&A, royalties and unique marketing arrangements. AOC offers a dynamic and exciting work environment for the right candidate. AOC is publicly traded on the TSX under the symbol “ATH”.

Senior Reservoir Engineer

We are currently recruiting for a Senior Reservoir Engineer to join the Thermal Development team. This role will provide reservoir engineering input optimization of SAGD field development with a focus on Leismer and opportunities to support the Corner and Hangingstone assets.

This position is based in Calgary.

Responsibilities

- Generate reservoir production forecasts in support of optimizing and defining future development
- Generation of key input into field development plans including optimal well placement, spacing and configuration to maximize the economic performance of development targets
- Integrate geoscience information into field performance optimization activities
- Integrate surface facility requirements into steam and emulsion forecasts
- Support the development team reservoir engineers in building the field development plan
- Responsible for production forecasts on capital projects, annual budget, and reserves
- Active participant in preparation and execution of drilling programs
- Interface with production and facilities engineers, geoscientists, drilling and completions engineers, and operations
- Preparation of technical documents and presentations for technical staff and management
- Prepare presentations for Executive for Board Presentations, Budget, and Reserves reviews
- Gather current practices, and oversee development of best practices and operating philosophy
- Evaluation of alternative recovery processes, production technologies, and completing competitor analysis

Qualifications

- Minimum BSc. in Engineering and have good standing with APEGA with P.Eng., designation
- Minimum 10 years of reservoir engineering experience with minimum of 5 years within SAGD
- Experience in working within a multidisciplinary team, with involvement making daily operational decisions
- Ability to create innovative solutions to enhance reservoir performance and optimize future development
- Strong ability to analyze and problem solve
- A self-starter with a results-oriented work style combined with strong communication and interpersonal skills
- Ability to foster a cooperative, results oriented work environment with a mindset for continuous improvement
- Ability to manage multiple demands and able to consistently meet deadlines
- Strong communication skills, both written and verbal
- Must be legally entitled to work in Canada

Please email your resume with a cover letter to careers@atha.com with “Senior Reservoir Engineer” in the subject line of the email by **August 5, 2022**. We thank you in advance for your interest and note that only those selected for an interview will be contacted.

Athabasca Oil Corporation is an equal opportunity employer.
