

Maintenance Lead

Athabasca Oil Corporation ("AOC") is an intermediate oil-weighted company with assets located in several of the largest resource plays in Western Canada including the Montney, Duvernay and Oil Sands. With approximately 40,000 boe/d of production, exceptional growth potential and a strong liquidity position AOC offers a dynamic and exciting work environment for the right candidate. AOC is publicly traded on the TSX under the symbol "ATH".

Reporting to the Maintenance Foreman, the Maintenance Lead will work closely with maintenance team and maintenance planner to oversee execution of daily maintenance and work with project teams, to ensure maintenance support. This role will appeal to positive leader who excels in bringing engagement, execution and thrives in a collaborative fast pace environment. This position will be based at the Leismer asset but will provide support to Hangingstone maintenance technicians. Rotation will be 7on-7off.

Responsibilities:

- Performs safety monitoring of technicians, shift leads and contractors
- Ensures execution of daily maintenance activities
- Communicates expected availability and real-time delays to stakeholders while providing mitigation recommendations.
- Single point of contact for information concerning maintenance work, equipment, and equipment repairs
- Works with project teams to ensure project deliverables are met for maintenance requirements
- Supports maintenance improvement specialist in root cause analysis
- Works with Maintenance Foreman to determine training needs for technicians
- Provides maintenance planner with weekly work order prioritization
- Owns PM development, review and functionality analysis
- Ensures proper Work Order Quality, Resource Utilization, PM completion rate, PM Ratio, Reactive Work Usage, Maintenance Efficiency, Time Entry, electronic signatures, work closing etc.)
- Provides maintenance KPI reporting
- Participates in daily, weekly and monthly departmental meetings
- Technical Resource for Maintenance Planner
- Shop Rebuild Process Oversight
- Maintains knowledge of the work order backlog and set priorities for shutdown work
- Manage and communicate cost reports

Qualifications:

- Trades journeyman certificate
- 8 or more years maintenance planning experience
- 5-10 years of experience in the oil & gas industry
- Strong interpersonal, communication, problem solving and organizational skills

- Comprehensive knowledge of maintenance and reliability practices
- Self-motivated and team orientated
- Ability to manage multiple projects and conflicting priorities
- Possess a valid Alberta driver's license
- Proficient in Microsoft Office Suite (Outlook, Word, Excel) and able to develop additional computer skills as required
- Sound knowledge of Maximo is an asset

We offer an exciting and entrepreneurial work environment and an array of projects in our portfolio.

Athabasca Oil Corporation is an equal opportunity employer.
